Heritage

Glacier

Phoenix

# Meet Halo: The Pontoon, Reimagined

The Halo isn't just a boat; it's a vibrant departure from the sea of same. Designed to break the mold of traditional pontoon aesthetics, Halo swaps dated aluminum rails for sleek, integrated PolyForm exterior fences and seat frames. This modern, unified construction creates a seamless silhouette that is as durable as it is striking.

Infused with energy and a bold sense of fun, Halo's vibrant color palette and contemporary lines turn every outing into a statement. By reimagining the very foundation of the boat, we've created an open, 360-degree social space that feels less like a floating platform and more like a high-end lounge. From its impact-resistant sides to its spirited personality, the Halo is a colorful, modern evolution built for those who want their time on the water to be as bold as they are.

A sleek, modern console anchors the Halo Pontoon Boat, blending style with smart functionality. Equipped with all essential gauges and switches, it keeps you in full command on the water. The tilt steering and ergonomic Sport Chair add tailored comfort, letting you adjust your posture and settle in for effortless control and a smooth, easy-going ride.

Two JBL speakers bring flexible, high-quality sound to your experience. Easily detachable and wireless, these speakers let you enjoy music anywhere on the boat or even ashore. Integrated weather-resistant holders and straps on both port and starboard sides, positioned near a USB charging port, keep your speakers secure and powered, ensuring your tunes play all day long.

Easily moveable from one location to another, this backrest adapts to your needs, allowing you to create the perfect lounging spot wherever you desire. Whether you're leaning in for a close chat, stretching out to relax, or turning to face guests for a lively gathering, it adapts effortlessly to ensure your comfort.
